

UF nurse researcher is inviting Black/African American adults who have knee osteoarthritis pain.

You can help us better understand joint pain!

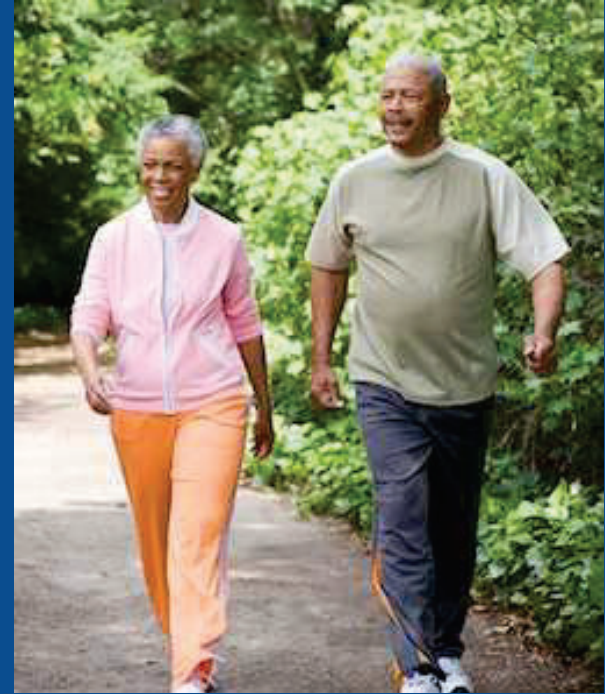

We want to learn more about your experience on how knee pain impacts movement and function.

Study participation involves:

- Vital signs, questionnaires, and knee function testing
- Free knee x-rays

Participants receive:

- Compensation for study completion
- Complimentary parking and snacks

Interested in participating? Want to know more information? Contact us!

Phone: (352) 273-6351
