

Test-Retest Reliability of the
MIND Diet Screener

PARTICIPANTS NEEDED!

PURPOSE:

The purpose of this study is to determine the test-retest reliability of the MIND diet screener in older adults.

TO PARTICIPATE YOU NEED TO BE:

- 85-105 years of age
- Willing to complete the 15-item MIND diet screener and answer retrospective food insecurity questions by telephone at two separate time points

INTERESTED IN PARTICIPATING?

Please call or email the study team.
